INDEX TO SUBJECTS

A

Actinomycin binding in HeLa cells, chromatin structure and cell division cycle, biochemical study, 322
– D, recovery of transcription after inhibition by, in Vero, HeLa, and L cells, biochemical and radioautographic study, 299
Acyltransferases and phospholipid synthesis, localization of, in smooth endoplasmic reticulum membranes in liver of phenobarbital-treated rat, biochemical and cytochemical EM study, 282
Adenosine monophosphate, cyclic, effect on proliferation of human fibroblasts, biochemical and immunological study, 19
Adrenal cortex, of human male, new crystal-containing cell in, light and EM study, 126
Algae *Polysiphonia sertularioides*, mitochondria, DNase-sensitive twisted structure in matrix of, EM study, 530
Amino acid composition, of proteins of membranes from guinea pig pancreas, biochemical and EM study, 1
ATP of chick embryo fibroblasts, effects of cytochalasin B on, biochemical study, 242
ATPase activity and ultrastructure of red and white muscle fibers of caudal region of fish *Salmo gairdneri*, biochemical and light and EM study, 42
–, of myosins of chick embryo myotubes and skeletal muscle, biochemical study, 586

B

Bacteria *Bacillus subtilis*, localization of sites of membrane synthesis in, biochemical and radioautographic and EM study, 32
– *Escherichia coli*, membrane-envelope fragments, respiration and protein synthesis in, solubilization and characterization of electron transport chain, biochemical study, 266
Basal lamina, role in regeneration of injured rat and rabbit skeletal muscle fibers and capillaries, light and EM study, 406
Beef, heart, mitochondria, inequality of gross morphological change and oxidative phosphorylation, biochemical and EM study, 457
Birefringence, form, of bull sperm, physical chemical study, 489
– melting of squid, bull, and human sperm nucleoprotein, physical chemical study, 489
Blastomere nucleus, formation of, in rabbit zygote, light and EM study, 533
Brain and liver, of rat, mitochondria, sialic acid residues on surface of, biochemical study, 147
–, of rat, synaptic complexes from, biochemical and EM study, 696
5-Bromodeoxyuridine, incorporation of into low molecular weight nuclear DNA, of sea urchin embryos, biochemical study, 74
Bull, sperm, form birefringence of, physical chemical study, 501
–, squid, and human sperm, birefringence melting of nucleoprotein of, physical chemical study, 489

C

Calcium binding to insect intestinal membranes, EM study, 58
Capillaries, of injured rat and rabbit skeletal muscle, role of basal lamina in regeneration of, light and EM study, 406
Cations, divalent, isolation of nuclear membranes from rat liver by fractionation with, biochemical and EM study, 104
Caudal region, of fish *Salmo gairdneri*, ultrastructure and ATPase activity of red and white muscle fibers of, biochemical and light and EM study, 42
Cell, crystal-containing, in adrenal cortex of human male, light and EM study, 126
— cycle-dependent desquamation of heparan sulfate from cell surface, of Chinese hamster CHO cells, biochemical study, 713
— division cycle and chromatin structure, actinomycin binding in HeLa cells, biochemical study, 322
— growth, in *Saccharomyces cerevisiae*, inhibition of by Colcemid, characterization of Colcemid-binding activity, biochemical and EM study, 355
–, red blood, human, enzymatic iodination of membrane of, biochemical study, 390
— sorting in presence of cytochalasin B, in chick embryo heart ventricle, neural retina, retinal pigment epithelium, and limb bud, histological study, 542
— sorting and tissue spreading, reversible inhibition of by cytochalasin B, in chick embryo heart ventricle, liver, neural retina, and limb bud, cytological study, 606
— surface changes during dedifferentiation in metaplastic transformation of iris into lens, of newt eye, biochemical study, 134
Cells, aerobic and anaerobic, of *Saccharomyces cerevisiae*, organization of ribosomal granules within mitochondria of, EM study, 721
–, chick embryo fibroblasts, effects of cytochalasin B on ATP of, biochemical study, 242
–, chick embryo lens, cell elongation in epithelium of with and without protein synthesis, involvement of microtubules, biochemical and histological and radioautographic and EM study, 82
–, Chinese hamster CHO line, cell cycle-dependent

desquamation of heparan sulfate from cell surface, biochemical study, 713
Cells, exocrine, of pancreas of mouse, rat, dog, and human, fenestrae in rough endoplasmic reticulum of, freeze-etch EM study, 245
—, follicle, of silkmoth ovariole, production of eggshell proteins by, biochemical study, 653
—, granulosa, dividing and interphase, of rat ovary, nexus junctions between, EM study, 511
—, HeLa S3, in mitosis, separation and partial synchrony of by colloidal silica density gradient centrifugation, biochemical study, 579
—, HeLa and phytohemagglutinin-stimulated lymphocytes, time sequence of nuclear pore formation during cell cycle, biochemical and radioautographic and EM study, 433
—, HeLa S3 strain, chromatic structure and cell division cycle, actinomycin binding in, biochemical study, 322
—, human fibroblasts, effect of cyclic adenosine monophosphate on proliferation of, biochemical and immunological study, 19
—, Novikoff hepatoma, cytochalasin B inhibition of nucleoside transport by, biochemical study, 179
—, Novikoff hepatoma, thymidine uptake by, incorporation into DNA, biochemical study, 161
—, Vero, HeLa, and L strain, recovery of transcription in after inhibition by actinomycin D, biochemical and radioautographic study, 299
—, visual, of honeybee retina, protein synthesis in, radioautographic light and EM study, 595
Centrifugation, colloidal silica density gradient, separation and partial synchrony of HeLa cells in mitosis, biochemical study, 579
Chick, embryo, heart, formation and ultrastructure of synthetic strands of cardiac muscle, cinematographic and EM study, 563
—, embryo, heart ventricle, liver, neural retina, and limb bud, reversible inhibition of cell sorting and tissue spreading by cytochalasin B, cytological study, 606
—, embryo, heart ventricle, neural retina, retinal pigment epithelium, and limb bud, cell sorting in presence of cytochalasin B, histological study, 542
—, embryo, liver, phenobarbital-sensitive control of uridine diphosphate glucuronyltransferase activity, biochemical and light microscope study, 448
—, embryo, myotubes, skeletal muscle, properties of myosins of, biochemical study, 586
Chicken, skeletal muscle, two components of M band protein, biochemical and immunological study, 681
Chorion (eggshell proteins), production of by silkmoth follicular cells, specific protein synthesis in cellular differentiation, biochemical study, 653
Chromatin structure and cell division cycle, actinomycin binding in HeLa cells, biochemical study, 322
— template activity, changes in, related to DNA synthesis, in mouse parotid glands stimulated by isoproterenol, biochemical study, 554
Cilia, of *Paramecium multimicronucleatum*, motion of, scanning EM study, 250
Colcemid inhibition of cell growth, characterization of binding activity of, in *Saccharomyces cerevisiae*, biochemical and EM study, 355
Complexes, synaptic, of rat brain, biochemical and EM study, 696
Cortisone, effects on rat liver mitochondria, concept of mitochondrial fusion, biochemical study, 635
Crystal-containing cell, in adrenal cortex of human male, light and EM study, 126
Cyclic AMP, effect on proliferation of human fibroblasts, biochemical and immunological study, 19
Cytochalasin B, cell sorting in presence of, in chick embryo heart ventricle, neural retina and retinal pigment epithelium, and limb bud, histological study, 542
— B, effects on ATP of chick embryo fibroblasts, biochemical study, 242
— B, inhibition of nucleoside transport by, in cultured Novikoff hepatoma cells, biochemical study, 179
— B, reversible inhibition of cell sorting and tissue spreading by, in chick embryo heart ventricle, liver, neural retina, and limb bud, cytological study, 606

D

Desquamation, cell cycle-dependent, of heparan sulfate from cell surface of Chinese hamster CHO cells, biochemical study, 713
Differentiation, cellular, specific protein synthesis in, production of eggshell proteins by silkmoth follicular cells, biochemical study, 653
DNA, low molecular weight, in nucleus of sea urchin embryo, incorporation of 5-bromodeoxyuridine into, biochemical study, 74
—, of ribosomes, localization of in oocytes of cricket *Acheta domesticus*, biochemical and radioautographic study, 310
— synthesis and changes in chromatin template activity, in mouse parotid glands stimulated by isoproterenol, biochemical study, 554
— synthesis in human fibroblasts, effect of cyclic adenosine monophosphate on, biochemical and immunological study, 19
—, uptake of thymidine and incorporation into, by cultured Novikoff hepatoma cells, biochemical study, 161
DNase-sensitive twisted structure, in mitochondrial matrix of *Polysiphonia sertularioides*, EM study, 530
Dog, mouse, rat, and human, pancreas, fenestrae in rough endoplasmic reticulum in exocrine cells of, freeze-etch EM study, 245
Dye, Procion yellow, distribution of synapses on motor neuron in leech central nervous system after injection of, light and EM study, 205

E

Eggshell proteins (chorion), production of by silkmoth follicular cells, specific protein synthesis in cellular differentiation, biochemical study, 653

Electron transport chain, solubilization and characterization of, respiration and protein synthesis in *Escherichia coli* membrane-envelope fragments, biochemical study, 266
Embryo, chick, heart, formation and ultrastructure of synthetic strands of cardiac muscle, cinematographic and EM study, 563
—, chick, heart ventricle, liver, neural retina, and limb bud, reversible inhibition of cell sorting and tissue spreading by cytochalasin B, cytological study, 606
—, chick, heart ventricle, neural retina, retinal pigment epithelium, and limb bud, cell sorting in presence of cytochalasin B, histological study, 542
—, chick, liver, phenobarbital-sensitive control of uridine diphosphate glucuronyltransferase activity, biochemical and light microscope study, 448
—, chick, myotubes and skeletal muscles, properties of myosins of, biochemical study, 586
—, of sea urchin, selective inhibition of genetic transcription in, incorporation of 5-bromodeoxyuridine into low molecular weight nuclear DNA, biochemical study, 74
Endoplasmic reticulum, rough, fenestrae in exocrine cells of pancreas of mouse, rat, dog, and human, freeze-etch EM study, 245
Enzyme, soluble horseradish peroxidase, interaction of with mouse peritoneal macrophages, biochemical and cytochemical study, 186
—, uridine diphosphate glucuronyltransferase, phenobarbital-sensitive control of activity of in chick embryo liver, biochemical and light microscope study, 448
Epithelium, of cultured chick embryo lens, cell elongation in with and without protein synthesis, role of microtubules, biochemical and histological and radioautographic and EM study, 82
Erythrocyte, human, enzymatic iodination of membrane of, biochemical study, 390
Eye, of newt, cell surface changes during dedifferentiation in metaplastic transformation of iris into lens, biochemical study, 134

F

Fenestrae, in rough endoplasmic reticulum of exocrine pancreatic cells of mouse, rat, dog, and human, freeze-etch EM study, 245
Filaments, myosin, of insect *Charagia virescens* flight muscle, freeze-fractured EM study, 520
Fish *Salmo gairdneri*, ultrastructure and ATPase activity of red and white muscle fibers in caudal region of, biochemical and light and EM study, 42
Fungus *Fusarium oxysporum*, ultrastructure and time course of mitosis in, light and EM study, 368
Fusion, mitochondrial, effects of cortisone on rat liver mitochondria, biochemical study, 635

G

Ganglion, trigeminal, of rat, nematosomes in, EM study, 718
Gastropod *Aplysia californica*, giant neurons, granular extensions of nucleoli of, light and EM study, 237
Gene activity, correlation to changes in respiratory metabolism, in *Drosophila hydei* salivary gland, biochemical study, 257
Golgi apparatus, in developing rat liver, EM morphometric study, 524
Granular extensions, of nucleoli in giant neurons of *Aplysia californica*, light and EM study, 237
Granules, ribosomal, of *Saccharomyces cerevisiae*, organization of within mitochondria of aerobic and anaerobic cells of, EM study, 721
Guinea pig, pancreas, polyacrylamide gel electrophoresis and amino acid composition of membrane proteins of, biochemical and EM study, 1

H

Heart, of beef, mitochondria, inequality of gross morphological change and oxidative phosphorylation, biochemical and EM study, 457
—, of chick embryo, formation and ultrastructure of synthetic strands of cardiac muscle, cinematographic and EM study, 563
Hen, shell gland tissue, thin-sectioned, low temperature ultramicroincineration of, EM study, 328
Heparan sulfate, cell cycle-dependent desquamation of, from cell surface of Chinese hamster CHO cells, biochemical study, 713
Horseradish peroxidase (HRP)-anti HRP immune complexes, in vitro interaction of with mouse peritoneal macrophages, biochemical and cytochemical and immunological study, 616
Horseshoe crab *Limulus polyphemus*, skeletal muscle, localization of contractile protein in, immunohistological study, 221
Human, adrenal cortex, new crystal-containing cell in, light and EM study, 126
—, bull, and squid sperm, birefringence melting of nucleoprotein of, physical chemical study, 489
—, dog, mouse, and rat, pancreas, fenestrae in rough endoplasmic reticulum in exocrine cells of, freeze-etch EM study, 245
—, lymphocytes, stimulated by phytohemagglutinin, specific inhibition of transcription by rifampicin in, biochemical study, 515
—, red blood cell, enzymatic iodination of membrane of, biochemical study, 390

I

Immune complexes, particulate horseradish peroxidase (HRP)-anti HRP, in vitro interaction of with mouse peritoneal macrophages, biochemical and cytochemical and immunological study, 616
Incineration, ultramicro-, low temperature, of thin-sectioned tissue, EM study, 328
Insect *Charagia virescens*, flight muscle, freeze-fractured myosin filaments of, EM study, 520
—, cockroach *Periplaneta americana*, midgut, calcium binding to intestinal membranes of, EM study, 58

Insect *Charagia virescens*, cricket *Acheta domesticus*, oocyte, localization of ribosomal DNA in, biochemical and radioautographic study, 310
— *Drosophila hydei*, salivary gland, effect of changes in respiratory metabolism on genome activity, biochemical study, 257
—, honeybee drone *Apis mellifera*, retina, visual cells, protein synthesis in, radioautographic light and EM study, 595
— *Sciara coprophila*, salivary glands, cellular and secretory proteins of, during larval-pupal transformation, biochemical and cytological study, 420
—, silkmoth *Antheraea polyphemus* and *A. pernyi*, ovariole, production of eggshell proteins by follicular cells of, specific protein synthesis in cellular differentiation, biochemical study, 653
Intestine, of cockroach, calcium binding to membranes of, EM study, 58
Iodination, enzymatic, of human red blood cell membrane, biochemical study, 390
Iris, of newt eye, cell surface changes during dedifferentiation in transformation of into lens, biochemical study, 134
Isoproterenol, changes in chromatin template activity related to DNA synthesis in mouse parotid glands stimulated by, biochemical study, 554

J

Junction, neuromuscular, development of in newt muscle, degeneration of motor end plates after denervation, cytochemical and EM study, 93
Junctions, nexus, between dividing and interphase granulosa cells of rat ovary, EM study, 511

K

Kinetochores, in fungus *Fusarium oxysporum*, structure of during mitosis, light and EM study, 368

L

Larval-pupal transformation of *Sciara coprophila*, cellular and secretory proteins of salivary glands during, biochemical and cytological study, 420
Leech *Hirudo medicinalis*, segmental ganglion, distribution of synapses on motor neuron of, after injection of Procion yellow dye, light and EM study, 205
Lens, of newt eye, cell surface changes during dedifferentiation in transformation of iris into, biochemical study, 134
Liver and cerebral cortex, of rat, mitochondria, sialic acid residues on surface of, biochemical study, 147
—, of chick embryo, phenobarbital-sensitive control of uridine diphosphate glucuronyltransferase activity, biochemical and light microscope study, 448
—, of rat, Golgi apparatus in development of, EM morphometric study, 524
—, of rat, mitochondria, effects of cortisone, concept of mitochondrial fusion, biochemical study, 635
—, of rat, nucleus, fractionation of by divalent cations, isolation of membranes of, biochemical and EM study, 104
—, of rat treated with phenobarbital, biogenesis of smooth endoplasmic reticulum membranes, localization of actyltransferases and phospholipid synthesis, biochemical and cytochemical EM study, 282
Lymphocytes, human, stimulated by phytohemagglutinin, specific inhibition of transcription by rifampicin in, biochemical study, 515

M

Macrophages, mouse, in vitro interaction of soluble horseradish peroxidase with, biochemical and cytochemical study, 186
—, peritoneal, of mouse, in vitro interaction of particulate horseradish peroxidase (HRP)-anti HRP immune complexes with, biochemical and cytochemical and immunological study, 616
M band protein, two components of, from chicken skeletal muscle, biochemical and immunological study, 681
Membrane, of human red blood cell, enzymatic iodination of, biochemical study, 390
— proteins, of guinea pig pancreas, polyacrylamide gel electrophoresis and amino acid composition of, biochemical and EM study, 1
Membrane-envelope fragments, of *Escherichia coli*, respiration and protein synthesis in, solubilization and characterization of electron transport chain, biochemical study, 266
Membranes, of insect intestine, calcium binding to, EM study, 58
—, of rat liver nucleus, isolation of by fractionation with divalent cations, biochemical and EM study, 104
—, smooth endoplasmic reticulum, biogenesis of in liver of phenobarbital-treated rat, localization of acyltransferases and phospholipid synthesis, biochemical and cytochemical EM study, 282
— synthesis, localization of, in *Bacillus subtilis*, biochemical and radioautographic and EM study, 32
Microtubules, role in cell elongation in cultured chick embryo lens epithelium with and without protein synthesis, biochemical and histological and radioautographic and EM study, 82
Midgut, of cockroach, calcium binding to intestinal membranes of, EM study, 58
Mitochondria, of aerobic and anaerobic cells of *Saccharomyces cerevisiae*, organization of ribosomal granules within, EM study, 721
—, of beef heart, inequality of gross morphological change and oxidative phosphorylation, biochemical and EM study, 457
—, of *Polysiphonia sertularioides*, DNase-sensitive twisted structure in matrix of, EM study, 530
—, of rat cerebral cortex and liver, sialic acid residues on surface of, biochemical study, 147
—, of rat liver, effects of cortisone, concept of mitochondrial fusion, biochemical study, 635
Mitosis, of HeLa cells, separation and partial synchrony of by colloidal silica density gradient centrifugation, biochemical study, 579
—, time course of, and ultrastructure, in fungus *Fusarium oxysporum*, light and EM study, 368

Motor end plates, degeneration of after denervation, development of neuromuscular junction in newt muscle, cytochemical and EM study, 93
Mouse, parotid glands, stimulated by isoproterenol, changes in chromatin template activity related to DNA synthesis, biochemical study, 554
—, peritoneal macrophages, in vitro interaction of particulate horseradish peroxidase (HRP)-anti HRP immune complexes with, biochemical and cytochemical and immunological study, 616
—, peritoneal macrophages, in vitro interaction of soluble horseradish peroxidase with, biochemical and cytochemical study, 186
—, rat, dog, and human, pancreas, fenestrae in rough endoplasmic reticulum in exocrine cells of, freeze-etch EM study, 245
Muscle, cardiac, formation and ultrastructure of synthetic strands of, from chick embryo heart, cinematographic and EM study, 563
— fibers, red and white, of caudal region of fish *Salmo gairdneri*, ultrastructure and ATPase activity of, biochemical and light and EM study, 42
—, flight, of insect *Charagia virescens*, freeze-fractured myosin filaments of, EM study, 520
—, of newt, development of neuromuscular junction, degeneration of motor end plates after denervation, cytochemical and EM study, 93
—, skeletal, of chicken, two components of M band protein, biochemical and immunological study, 681
—, skeletal, of *Limulus polyphemus*, localization of contractile proteins in, immunohistochemical study, 221
—, skeletal, and myotubes, of chick embryo, properties of myosin of, biochemical study, 586
—, skeletal, of rabbit, isolation and characterization of sarcoplasmic reticulum of, biochemical and EM study, 471
—, skeletal, of rat and rabbit, role of basal lamina in regeneration of injured fibers and capillaries, light and EM study, 406
Myosin filaments, of insect *Charagia virescens* flight muscle, freeze-fractured EM study, 520
Myosins, of chick embryo myotubes and skeletal muscle, biochemical study, 586
Myotubes and skeletal muscle, of chick embryo, properties of myosins of, biochemical study, 586

N

Nematosomes, in rat trigeminal ganglion, EM study, 718
Nervous system, central, of leech, distribution of synapses on motor neuron on, after injection of Procion yellow dye, light and EM study, 205
Neuromuscular junction, development of in newt muscle, degeneration of motor end plates after denervation, cytochemical and EM study, 93
Neuron, motor, in leech central nervous system, distribution of synapses on after injection of Procion yellow dye, light and EM study, 205
Neurons, giant, of *Aplysia californica*, granular extensions of nucleoli of, light and EM study, 237
Newt *Triturus viridescens*, muscle, development of neuromuscular junction, degeneration of motor end plates after denervation, cytochemical and EM study, 93
Newts *Notophthalmus viridescens* and *Taricha granulosa*, eye, cell surface changes during dedifferentiation in metaplastic transformation of iris into lens, biochemical study, 134
Nuclear pore formation, in HeLa cells and phytohemagglutinin-stimulated lymphocytes, biochemical and radioautographic and EM study, 433
Nucleoli, granular extensions of, in giant neurons of *Aplysia californica*, light and EM study, 237
Nucleoprotein, of squid, bull, and human sperm, birefringence melting of, physical chemical study, 489
Nucleoside transport by cultured Novikoff hepatoma cells, inhibition by cytochalasin B, biochemical study, 179
Nucleus, of blastomere in rabbit zygote, formation of, light and EM study, 533
—, of rat liver, fractionation of by divalent cations, isolation of membranes of, biochemical and EM study, 104
—, of sea urchin, embryo, incorporation of 5-bromodeoxyuridine into low molecular weight DNA of, biochemical study, 74

O

Oocyte, of cricket *Acheta domesticus*, localization of ribosomal DNA in, biochemical and radioautographic study, 310
Ovariole, of silkmoth, production of eggshell proteins by follicular cells of, specific protein synthesis in cellular differentiation, biochemical study, 653
Ovary, of rat, nexus junctions between dividing and interphase granulosa cells of, EM study, 511

P

Pancreas, of guinea pig, polyacrylamide gel electrophoresis and amino acid composition of membrane proteins of, biochemical and EM study, 1
—, of mouse, rat, dog, and human, fenestrae in rough endoplasmic reticulum in exocrine cells of, freeze-etch EM study, 245
Parotid glands, of mouse, stimulated by isoproterenol, changes in chromatin template activity related to DNA synthesis, biochemical study, 554
Peroxidase, horseradish, in vitro interaction of with mouse peritoneal macrophages, biochemical and cytochemical study, 186
Phenobarbital-sensitive control of uridine diphosphate glucuronyltransferase activity, in chick embryo liver, biochemical and light microscope study, 448
Phospholipid synthesis and acyltransferases, localization of, in smooth endoplasmic reticulum membranes in liver of phenobarbital-treated rat, biochemical and cytochemical EM study, 282
Phosphorylation, oxidative, and morphological change, in beef heart mitochondria, biochemical and EM study, 457
Phytohemagglutinin, specific inhibition of tran-

scription by rifampicin in human lymphocytes stimulated by, biochemical study, 515
Pore formation, nuclear, in HeLa cells and phytohemagglutinin-stimulated lymphocytes, biochemical and radioautographic and EM study, 433
Protein, M band, two components of, from chicken skeletal muscle, biochemical and immunological study, 681
— synthesis and cell elongation in cultured chick embryo lens epithelium, role of microtubules, biochemical and histological and radioautographic and EM study, 82
— synthesis in cellular differentiation, production of eggshell proteins by silkmoth follicular cells, biochemical study, 653
— synthesis and respiration in *Escherichia coli* membrane-envelope fragments, solubilization and characterization of electron transport chain, biochemical study, 266
— synthesis, in visual cells of honeybee retina, radioautographic light and EM study, 595
Proteins, cellular and secretory, of *Sciara coprophila* salivary glands, during larval-pupal transformation, biochemical and cytological study, 420
—, contractile, localization of in *Limulus* striated muscle, immunohistochemical study, 221
—, of membranes of guinea pig pancreas, polyacrylamide gel electrophoresis and amino acid composition of, biochemical and EM study, 1
Protozoan *Paramecium multimicronucleatum*, ciliary motion in, scanning EM study, 250
— *Tetrahymena pyriformis*, water expulsion vesicle of, cinematographic and EM study, 644

R

Rabbit and rat, skeletal muscle, role of basal lamina in regeneration of injured fibers and capillaries, light and EM study, 406
—, skeletal muscle, isolation and characterization of sarcoplasmic reticulum of, biochemical and EM study, 471
—, zygote, formation of blastomere nucleus, light and EM study, 533
Radioactive label, actinomycin-^{3}H and thymidine-^{14}C, chromatin structure and cell division cycle, actinomycin binding in HeLa cells, biochemical study, 322
— label, amino acids-^{14}C, uridine-^{14}C, actinomycin-^{14}C, and actinomycin-^{3}H, recovery of transcription in Vero cells after inhibition by actinomycin D, biochemical and radioautographic study, 299
— label, ATP-^{14}C, ATP-^{3}H, leucine-^{3}H, and uridine-^{3}H, changes in chromatin template activity related to DNA synthesis, in mouse parotid glands stimulated by isoproterenol, biochemical study, 554
— label, calcium chloride-^{45}Ca, isolation and characterization of sarcoplasmic reticulum of rabbit skeletal muscle, biochemical and EM study, 471
— label, colchicine-^{3}H and Colcemid-^{3}H, Colcemid inhibition of cell growth and characterization of Colcemid-binding activity in *Saccharomyces cerevisiae*, biochemical and EM study, 355
Radioactive label, ferric chloride-^{55}Fe, respiration and protein synthesis in *Escherichia coli* membrane-envelope fragments, solubilization and characterization of electron transport chain, biochemical study, 266
— label, glucosamine-^{3}H, cell cycle-dependent desquamation of heparan sulfate from cell surface, of Chinese hamster CHO cells, biochemical study, 713
— label, glycerol-^{14}C, glycerol-^{3}H, phenylalanine-^{14}C, and phenylalanine-^{3}H, localization of sites of membrane synthesis in *Bacillus subtilis*, biochemical and radioautographic and EM study, 32
— label, glycerol-^{14}C and palmityl-^{14}C coenzyme A, biogenesis of smooth endoplasmic reticulum membranes in liver of phenobarbital-treated rat, localization of acyltransferases and phospholipid synthesis, biochemical and cytochemical EM study, 282
— label, glycine-^{14}C, cystine-^{14}C, leucine-^{14}C, leucine-^{3}H, and methionine-^{3}H, specific protein synthesis in cellular differentiation, production of eggshell proteins by silkmoth follicular cells, biochemical study, 653
— label, leucine-^{3}H, protein synthesis in visual cells of honeybee retina, radioautographic light and EM study, 595
— label, leucine-^{14}C and thymidine-^{3}H, effects of cortisone on rat liver mitochondria, concept of mitochondrial fusion, biochemical study, 635
— label, leucine-^{3}H, thymidine-^{3}H, and uridine-^{3}H, time sequence of nuclear pore formation in HeLa cells and phytohemagglutinin-stimulated lymphocytes, biochemical and radioautographic and EM study, 433
— label, leucine-^{14}C and uridine-^{3}H, phenobarbital-sensitive control of uridine diphosphate glucuronyltransferase activity, in chick embryo liver, biochemical and light microscope study, 448
— label, leucine-^{3}H and uridine-^{3}H, specific inhibition of transcription by rifampicin in human lymphocytes stimulated by phytohemagglutinin, biochemical study, 515
— label, sodium iodide-^{125}I, enzymatic iodination of red blood cell membrane, biochemical study, 390
— label, sodium iodide-^{125}I, in vitro interaction of mouse peritoneal macrophages with particulate horseradish peroxidase (HRP)-anti HRP immune complexes with, biochemical and cytochemical and immunological study, 616
— label, sodium iodide-^{125}I, in vitro interaction of soluble horseradish peroxidase with mouse peritoneal macrophage, biochemical and cytochemical study, 186
— label, thymidine-^{3}H and succinyl-cAMP-tyrosine-methylester-^{125}I, effect of cyclic adenosine monophosphate on proliferation of human fibroblasts, biochemical and immunological study, 19
— label, thymidine-^{3}H, uptake of thymidine and incorporation into DNA by cultured Novikoff hepatoma cells, biochemical study, 161
— label, thymidine-^{3}H and uridine-^{3}H, cytochalasin

B inhibition of nucleoside transport by cultured Novikoff hepatoma cells, biochemical study, 179
Radioactive label, thymidine-^{3}H and uridine-^{3}H, incorporation of 5-bromodeoxyuridine into low molecular weight nuclear DNA, in sea urchin embryos, biochemical study, 74
– label, uridine-^{3}H and sodium borohydride-^{3}H, localization of ribosomal DNA in oocytes of cricket *Acheta domesticus*, biochemical and radioautographic study, 310
– label, valine-^{3}H, cell elongation in cultured chick embryo lens epithelium with and without protein synthesis, role of microtubules, biochemical and histological and radioautographic and EM study, 82
Rat, brain, synaptic complexes from, biochemical and EM study, 696
–, cerebral cortex and liver, mitochondria, sialic acid residues on surface of, biochemical study, 147
–, liver, Golgi apparatus in development of, EM morphometric study, 524
–, liver, mitochondria, effects of cortisone, concept of mitochondrial fusion, biochemical study, 635
–, liver, nucleus, fractionation of by divalent cations, isolation of membranes of, biochemical and EM study, 104
–, mouse, dog, and human, pancreas, fenestrae in rough endoplasmic reticulum in exocrine cells of, freeze-etch EM study, 245
–, ovary, nexus junctions between dividing and interphase granulosa cells of, EM study, 511
–, phenobarbital-treated, liver, biogenesis of smooth endoplasmic reticulum membranes, localization of acyltransferases and phospholipid synthesis, biochemical and cytochemical EM study, 282
– and rabbit, skeletal muscle, role of basal lamina in regeneration of injured fibers and capillaries, light and EM study, 406
–, trigeminal ganglion, nematosomes in, EM study, 718
Respiration, effect of changes in metabolism of on gene activity, in *Drosophila hydei* salivary gland, biochemical study, 257
– and protein synthesis, in *Escherichia coli* membrane-envelope fragments, solubilization and characterization of electron transport chain, biochemical study, 266
Retina of honeybee *Apis mellifera*, protein synthesis in visual cells of, radioautographic light and EM study, 595
Ribosomes, of oocytes of cricket *Acheta domesticus*, localization of DNA in, biochemical and radioautographic study, 310
–, of *Saccharomyces cerevisiae*, organization of granules within mitochondria of aerobic and anaerobic cells of, EM study, 721
Rifampicin, specific inhibition by of transcription in human lymphocytes stimulated by phytohemagglutinin, biochemical study, 515
RNA synthesis, recovery of after inhibition by actinomycin D, in Vero, HeLa, and L cells, biochemical and radioautographic study, 299

S

Salivary gland, of *Drosophila hydei*, effect of changes in respiratory metabolism on genome activity, biochemical study, 257
— glands, of *Sciara coprophila*, cellular and secretory proteins of, during larval-pupal transformation, biochemical and cytological study, 420
Sarcoplasmic reticulum, isolation and characterization of, from rabbit skeletal muscle, biochemical and EM study, 471
Sea urchin *Strongylocentrotus purpuratus*, embryo, selective inhibition of genetic transcription in, incorporation of 5-bromodeoxyuridine into low molecular weight nuclear DNA, biochemical study, 74
Sialic acid residues, on surface of mitochondria from rat cerebral cortex and liver, biochemical study, 147
Sperm, of bull, form birefringence of, physical chemical study, 501
—, of squid, bull, and human, birefringence melting of nucleoprotein of, physical chemical study, 489
Squid, bull, and human sperm, birefringence melting of nucleoprotein of, physical chemical study, 489
Synapses, distribution of on motor neuron in leech central nervous system, after injection of Procion yellow dye, light and EM study, 205
Synaptic complexes, of rat brain, biochemical and EM study, 696

T

Temperature, low, ultramicroincineration of thin-sectioned tissue, EM study, 328
Thymidine, uptake of and incorporation into DNA by cultured Novikoff hepatoma cells, biochemical study, 161
Time course of mitosis, and ultrastructure, in fungus *Fusarium oxysporum*, light and EM study, 368
Tissue, shell gland, of hen, thin-sectioned, low temperature ultramicroincineration of, EM study, 328
— spreading and cell sorting, reversible inhibition of by cytochalasin B, in chick embryo heart ventricle, liver, neural retina, and limb bud, cytological study, 606
Transcription, recovery of after inhibition by actinomycin D, in Vero, HeLa, and L cells, biochemical and radioautographic study, 299
—, specific inhibition of by rifampicin, in human lymphocytes stimulated by phytohemagglutinin, biochemical study, 515

U

Uridine diphosphate glucuronyltransferase activity in chick embryo liver, phenobarbital-sensitive control of, biochemical and light microscope study, 448

V

Vesicle, water expulsion, of ciliate *Tetrahymena pyriformis*, cinematographic and EM study, 644

W

Water expulsion vesicle, of ciliate *Tetrahymena pyriformis*, cinematographic and EM study, 644

Y

Yeast *Saccharomyces cerevisiae*, Colcemid inhibition of cell growth, characterization of Colcemid-binding activity in, biochemical and EM study, 355

Yeast *Saccharomyces cerevisiae*, organization of ribosomal granules within mitochondrial structures of aerobic and anaerobic cells of, EM study, 721

Z

Zygote, of rabbit, formation of blastomere nucleus, light and EM study, 533

Statement of Ownership, Management, and Circulation required by Act of 23 October 1962; Section 4369, Title 39, United States Code: *The Journal of Cell Biology*. Published monthly at Mount Royal and Guilford Avenues, Baltimore, Maryland 21202, for The Rockefeller University Press, New York 10021. Editor: Raymond Griffiths, The Rockefeller University, New York 10021. Owned by The Rockefeller University, New York 10021, nonprofit corporation, authorized to mail at special rates. Purpose, function, and nonprofit status of the organization and the exempt status for Federal income tax purposes have not changed during the preceding 12 months. Following statistics represent 12 month average and number nearest to date of filing: copies printed for each issue, 4776 sales through dealers, street vendors, counter sales, 0; mail subscriptions 4114. Total paid circulation, 4162; free distribution 48; office use, left-over, unaccounted, spoiled, 614; net press run, 4776. Single issue nearest filing date June 1972. (Signed W. A. Bayless, Director).
